REVIEW OF POLLING DISTRICTS AND POLLING PLACES 2014

REPORT OF CHIEF OPERATING OFFICER (AS ACTING RETURNING OFFICER)
AND ELECTORAL REVIEW MANAGER

Contact Officer: Chris Ashcroft Tel No: 01962 848 284

RECENT REFERENCES:

None

EXECUTIVE SUMMARY:

To comply with the Electoral Review of Polling Districts and Polling Places (Parliamentary Elections) Regulations 2006, every council in England and Wales must complete a review of all of the polling districts and polling places in its area by 31 January 2015. The Council last undertook this exercise in October – December 2011 (Reports LR370 refers).

Consultations have been undertaken with all Members, County Councillors, Parish Councils and relevant political and community groups. This report sets out the position at the conclusion of that consultation and notes that responses suggest general satisfaction with the polling districts and polling places used. The only exception relates to the ongoing West of Waterloo development and its impact on the Boarhunt & Southwick and Denmead Wards; this is discussed later in the report.

Apart from that one issue it is considered that, on balance, all the existing polling places are satisfactory and should remain.

RECOMMENDATIONS:

- 1 That, subject to 2 below, having considered the information and for the reasons explained in this report, the polling districts and polling places set out in Appendix A be approved and adopted.
- 2 That, with regard to the provision of polling places to serve the emerging communities on the West of Waterloo development:-
 - (a) in the Boarhunt & Southwick Ward, an additional polling place be established at Berewood Primary School for a newly created XW2 Polling District and
 - (b) in the Denmead Ward, the portakabin (at an exact location to be determined by the ARO) be retained as a polling place for the WR2 Polling District, until such time as the road link to the XW2 polling district is open, when Berewood Primary School be used instead.
- 3 That the likely need to undertake a further review in 2015, prior to the implementation of the Local Government Boundary Commission's new warding arrangements, be noted.

REVIEW OF POLLING DISTRICTS AND POLLING PLACES 2014

REPORT OF CHIEF OPERATING OFFICER (AS ACTING RETURNING OFFICER) AND ELECTORAL REVIEW MANAGER

DETAIL:

1 Introduction

1.1 Members are reminded that:-

- (a) although the title of the Regulations refers to Parliamentary Elections, it is clearly good practice and more efficient to use this exercise to also review the District Election situation, as the criteria for polling districts/stations is the same. Therefore, assessments have been made on that wider basis.
- (b) the review is conducted with each district council assessing the polling districts/places which come within its administrative area, regardless of any overlapping Parliamentary constituency boundaries.
- (c) the term 'polling district' describes the area created by sub-division of a ward (for the parished part of the City Council's area, these are all based on parish or parish ward boundaries).
- (d) the term 'polling place' is the building/place in which polling stations will be selected by the Acting Returning Officer (ARO), whilst the term 'polling station' can refer to either the building or the actual room used for polling within the building.
- (e) with this review, the location of polling districts/places is the responsibility of the Council and the location of polling stations within the polling place is the responsibility of the ARO. This is a technical separation and, in the City Council's case, the person with overall responsibility for electoral services and the current ARO is the same individual (Stephen Whetnall). This 'twin hatted' role is a familiar situation for many district councils and does not affect the validity of the review.

- 1.2 The ARO is responsible for the conduct of the elections for the two Parliamentary Constituencies which cover the Winchester District – namely the Winchester Constituency and the Meon Valley Constituency. The boundaries of those Constituencies extend to also cover parts of the Districts of Eastleigh (for Winchester Constituency) and East Hampshire and Havant (for Meon Valley Constituency).

- 1.3. The ARO has responded to polling place review consultations from Eastleigh Borough, Havant Borough and East Hampshire District Councils, in respect of those polling stations which he uses for the above.
- 1.4. This report concentrates solely on the polling places which are located within the Winchester District. There has been no attempt to separate and examine the stations on a Constituency basis, because in the context of this review, it would serve no particular purpose. Likewise, polling districts are not discussed in detail, having regard to the information contained in the 'Polling Districts and Boundary Review' section below.

2 Assessment of Polling Places

- 2.1 The Guidance contains the following key paragraphs:-

“Relevant authorities must seek to ensure that all electors in the constituency have such reasonable facilities for voting as are practicable in the circumstances.

They must seek to ensure that, so far as is reasonable and practicable, the polling places they are responsible for are accessible to all electors, including those who are disabled, and when considering the designation of a polling place, must have regard to the accessibility needs of disabled persons.”

- 2.2 There are currently 83 polling places used for Parliamentary elections covering the Winchester District. Of those, one is a 'double station' due to location and number of electors (All Saints Church Hall, Denmead), meaning that the register is divided equally between two teams of polling staff working within the same building. Two stations (Jubilee Hall, Kings Worthy and Itchen Abbas & Avington Village Hall) each serve two polling districts, because of a lack of suitable buildings for polling stations in the adjoining areas. As with Denmead, two teams of polling staff operate within the same hall in each case, but work from completely separate registers in these instances.
- 2.3 At every election, all Presiding Officers complete an assessment form which asks questions about the suitability of their premises as a polling place. Polling Station Inspectors also visit each location during polling day and report back on any issues. This has helped to highlight situations where additional measures are required, from the simple provision of more direction signs to the installation of ramps, or even a change of station. There were a few minor comments from the last elections on 22 May 2014 and these have already been taken into account.
- 2.4 Appendix A lists each of the 83 polling places used for Parliamentary election purposes, together with details about existing and projected electorates. Each polling place is graded 1-3 in terms of its overall suitability (1 being the most satisfactory). In assessing the gradings, a predominantly practical and

realistic approach has been taken to the buildings and facilities available. For the purposes of this review, the word 'disabled' has been used in the context of the practical issue of wheelchair access.

2.5 The gradings are defined as follows:-

- (a) Grade 1 – the polling place is conveniently located for the majority of electors, there is direct disabled access into the building/room used for polling, the room itself is suitable in terms of space, light etc and there are reasonable facilities for staff.
- (b) Grade 2 – the polling place is good in most respects, but one or two of the elements set out for Grade 1 are adequate, rather than good. Disabled access can be achieved, although not always with the same ease as Grade 1 polling places (e.g. disabled access may be through a side door which, in some cases, can be made the main entrance for polling day).
- (c) Grade 3 – the polling place is less than adequate in most respects and may well only be used because of a lack of alternatives. Convenient disabled access is either very difficult or not possible without major alterations.

2.6 In the parished areas in recent years, a number of the village halls which are used for polling places have been refurbished (some completely rebuilt) and so provide very good facilities. Permanent ramps have been constructed at some non-modernised halls, sometimes utilising a side door, because the steps and/or gradient at the front of the building cannot be changed at economic cost. The Council does provide temporary ramps, but as SCOPE (the disability group) point out, without proper assessment these ramps can be difficult to negotiate or even dangerous for wheelchair users. Therefore, only one is currently used - at Colden Common Pavilion.

2.7 Public houses are sometimes suggested as alternatives and, whilst these are often well situated and can offer reasonable access, some landlords do not welcome the disruption. Also, hire fees can be more expensive than halls, because loss of trade is usually taken into the fee calculation. Notwithstanding these issues, local circumstances mean that three public houses are currently used as polling places in the District – the Ship Inn at Bishops Sutton, the March Hare at Harestock and the Tichborne Arms.

2.8 Another suggestion sometimes made is the use of portakabin type temporary buildings. These are rarely a practical alternative, because to achieve proper disabled access they need to be sizeable, which presents problems in finding a suitable location, plus the cost of hire is significant, as it will normally have to include a generator, chemical toilet and furniture (totalling over £1,000).

- 2.9 In the Winchester Town area, the standard of polling places is generally good and eight buildings owned by the City Council are used - seven are the community lounges of sheltered housing schemes and one is The Courtyard, Guildhall. Outside the Town, two Council sheltered housing schemes are used; one is Greens Close, Bishops Waltham and the other is Makins Court, Alresford. The only other Council owned premises used for polling in the District is the Meadowside Leisure Centre at Whiteley.
- 2.10 The Council does not normally need to use schools for polling places. All attempts are made to maintain this situation as, understandably, Head Teachers and parents do not welcome either the disruption of closing the whole school for a day, or the security issues which arise if one building/classroom is used for polling and the remainder of the school remains open. Whilst the Council could requisition schools for polling purposes and would not have to pay a hire fee, it is required to meet the costs of the caretaker, together with any additional security provisions which would no doubt be insisted upon by the Head Teacher if the school remained open. This means that there are unlikely to be any major cost savings when compared to using a village hall for example.
- 2.11 However, the ongoing development and increasing electorate at West of Waterlooville has presented a situation where use of a school may be necessary and this is discussed further in paragraph 5.

3 Representations made at the last Review

- 3.1 The last review was undertaken in 2011 and, at that time, there was only one polling place which was rated as Grade 3 - The Caravan at Itchen Stoke – used because there were no other suitable buildings in such a small village.
- 3.2 The caravan at Itchen Stoke was situated on the ‘village green’ and served an electorate of about 180. It was a small touring caravan with an awning, under which the polling station was set out; therefore access was quite literally at ground level. A portaloos was provided for staff. The problem with siting a larger caravan or portakabin was that positioning and removal would almost certainly damage the green if conditions were wet and so some reinstatement works would be required. It was also very difficult to achieve proper disabled access with anything other than a very large portakabin.
- 3.3 Consequently, following local consultation, it was decided (as a trial) to move that polling station to Itchen Abbas & Avington Village Hall, which is a modern, sizeable building about 1.5 miles from Itchen Stoke along the B3047. It already served as a polling station for Itchen Abbas & Avington and was easily capable of accommodating a second. Since that change (in 2012) no adverse representations have been received about the relocation and so it has become a permanent arrangement.

- 3.4 An issue often raised (as it has been again this time – see paragraph 5) is the number of polling places created to serve the various smaller communities, which some people consider excessive and capable of amalgamation to save money (i.e. one central polling place to serve several parishes). It is a comment that has also been made in other contexts such as budgetary savings generally.
- 3.5 In response, there are two main points to consider. The first is that it is voter convenience and not cost which is the main driver of the review exercise. Of course, trying to achieve value for money is still very important, but judging from informal conversations with parish clerks for example, it should not be underestimated how much a polling station in the village is valued by local people. Making electors travel significant distances may well provoke an adverse reaction disproportionate to the possible savings.
- 3.6 Secondly, S18 of the Electoral Administration Act 2006 requires that each parish has its own polling district and that the polling place should be within that polling district, unless special circumstances prevail. It is the view of the ARO that such circumstances should normally be limited to situations where it is not possible to find a suitable building. If polling places were designated outside the parish, it would still be necessary to provide a split polling station for each parish within a larger venue.
- 3.7 In summary, no changes based solely on cost savings are proposed as part of this review, as geographical convenience to the voter is seen to be the most important factor.

4 Current Position

- 4.1 District, County, Police Commissioner and European elections have all been held during the past four years and, collectively, there have been very few adverse comments from voters, political parties or polling staff about the polling places used. Consequently, there has been far less need to relocate polling places (either permanently or temporarily) than during previous review periods.
- 4.2 Part of this has been due to coincidence, in the sense that there were a relatively high number of polling places affected by building works and improvements during 2007-2011, but these have long since been completed and that level of activity has not been replicated more recently. Secondly, the growth in the popularity of postal votes has been significant and it seems a reasonable assumption that many voters who (for whatever reason) had difficulty in accessing their local polling station – and therefore may have complained - have instead opted for the convenience of a postal vote.
- 4.3 The popularity of postal votes has also helped in relation to the Electoral Commission's guidance that a polling station should not cater for more than 2,500 electors, after postal voters have been deducted. The one station where this may have been a problem is Hyde Gate, Winchester with over

2,900 electors and not sufficient space to create a double station. But with over 500 postal voters to be deducted from that figure, the threshold is not exceeded.

- 4.4 The use of a room in the St Edburga block as a polling station at the University of Winchester (Sparkford Road) did result in critical comments from a few electors, who found it difficult to locate within the campus. With the co-operation of the University, the problem was resolved by significantly increasing the amount of directional signage, particularly when approaching from the Milnthorpe Lane direction.
- 4.5 Regarding the major residential development at West of Waterlooville, Cllr Stallard has commented on this situation and the matter is considered further below.
- 4.6 Similar large scale developments will occur north of Whiteley and at Barton Farm on the edge of Winchester Town. The electoral implications of this and other growth in housing numbers will form part of the deliberations on the current boundary review and will clearly have implications for future polling places in those areas.

5 Consultation Results

- 5.1 All Members, Parish Councils, County Councillors, political associations and relevant community groups were invited to comment on the suitability of the polling places we use. Responses received were as follows:-
 - (a) Cllr. Dibden – satisfied with polling stations in Droxford, Soberton and Hambledon
 - (b) Cllr. Stallard – drew attention to the portakabin on the Taylor Wimpey development at Waterlooville which is still convenient for the Denmead (WR2) electors. But other new electors in the Grainger ‘Berewood’ development, which comes within Southwick & Widley (XW), are some distance from the portakabin and the new Berewood School that opened in September would be a better venue for them.
 - (c) Tichborne Parish Council – important to local residents (especially the elderly and infirm) that the polling station in the village is maintained. The costs involved are easily justified by the democratic benefits of having an easily accessible place for people to vote.
 - (d) Bishops Waltham, Hambledon and Swanmore Parish Councils – satisfied with their respective polling stations.

- (e) Mrs S Robinson (Itchen Valley Parish Councillor) - to save money amalgamate the polling stations in Itchen Valley Ward. The days when an elector had to walk to their polling station are long gone. The elderly and infirm can have a postal vote, and nearly everyone else has their own transport living in the country where public transport is restricted.
- 5.2 Regarding point (b), for the past three years a portakabin has been provided (part funded by the developer) for those electors in the new Taylor Wimpey housing, all of which comes within Denmead Ward. The exact site of the polling place has varied, according to availability as the building programme progressed. The adjoining development (Berewood) is being built by Grainger Homes and the first phases are now occupied. This area comes wholly within Boarhunt & Southwick Ward and so those electors would currently need to go to Southwick to vote, which is several miles away.
- 5.3 A site visit was undertaken last week to assess whether both sets of electors could vote at either the portakabin, or perhaps the new Berewood Primary School which is a very suitable building and has excellent level access and facilities. However, there are currently no direct footpaths or road links between the two developments and this situation is very unlikely to change before the May 2015 elections. So, whichever location was chosen, one set of electors would need to make a time consuming journey by car, or walk a considerable distance around the perimeter of the development.
- 5.4 The visit to the new primary school identified a classroom on the edge of the complex which would be ideal, both in terms of a polling station and allowing the school to continue to function during polling day (over time, the exact location within the school could vary). The Head Teacher has been very supportive of this proposal and arrangements for the safe separation of voters and schoolchildren have been provisionally agreed.
- 5.5 Therefore, having regard to all the above, the ARO is recommending that the portakabin continues to serve its existing (Denmead WR2) electorate and the new Berewood Primary School becomes a polling station for those new (XW2) electors on the Grainger development, which comes within the Boarhunt & Southwick Ward. As the WR2 area continues to be developed, sites for the temporary portakabin will become harder to find. Therefore, at such time as the link road is provided, this polling place should transfer to the school.
- 5.6 Regarding point (e) about amalgamating the six Itchen Valley Ward polling stations, the comments made in paragraphs 3.4 – 3.7 answer this matter.
- 5.7 No other representations have been received to change the area covered by any polling district and none are proposed by the officers, as the existing basis is considered satisfactory, pending the outcome of the current boundary review discussed below.

6 Polling Districts and the Boundary Review

- 6.1 The process of reviewing district ward boundaries has commenced, following the decision of the Boundary Commission for England that it was 'minded' to accept the Council's recommendation to reduce the number of Councillors from 57 to 45. The work on ward boundaries will encompass a review of all polling districts and it is likely that some will change. The review will conclude in June 2015.
- 6.2 Unfortunately, because legislation requires the Council to complete this polling places review by 31 January 2015, the final outcome of the boundaries review cannot be awaited. However, there is still a benefit in reviewing polling places now, because any agreed changes can be implemented for the General Election in May 2015.
- 6.3 Whilst mentioning the General Election, it should be recalled that in 2012 a review of Parliamentary Constituency boundaries was undertaken. Proposals were made to revise the Winchester Constituency and abolish the Meon Valley Constituency by dividing its area amongst adjoining constituencies. However, for political reasons, those proposals were never enacted and so the 2015 General Election will be contested on the current Constituency basis. The next review of Parliamentary boundaries is scheduled for 2018.

7 Electorate Projections for 2019

- 7.2 Appendix A (column 4) sets out the projected electorate in 2019 for each polling district. The figures have been supplied by the Strategic Planning Team and based upon the Hampshire County Council Small Area Population Forecasts.
- 7.3 Regarding those Wards which show a relatively significant increase, Denmead and Boarhunt & Southwick have been mentioned already. The major development at Barton Farm has yet to commence and north of Whiteley will become another large housing scheme in due course. All these areas will be considered as part of the current boundary review and the polling places will be monitored as development on those sites progresses, before the next five year review.
- 7.4 In some areas, decreases in electorate projections are shown, which some Members may find surprising. However, the projections take account of such factors as the continuing reduction in average household size, which can have a marked impact. Also, in those wards affected, the figures allow for a reduction of 50% in student registration, following the introduction of Individual Elector Registration. This is because Universities are no longer allowed to complete a block return for all those accommodated in their halls of residence. Therefore, despite a possible targeted campaign, significant under-registration in this category of voter is being anticipated nationally.

- 7.5 With regard to future reviews, the Regulations require a Member level polling places review to be carried out at least every five years, but the ARO is able to conduct a review at any time should local circumstances require such action. As mentioned in para 7.2 above, this will be necessary before implementation of the Boundary Commission's agreed scheme for the 2016 elections.

OTHER CONSIDERATIONS:

8 SUSTAINABLE COMMUNITY STRATEGY AND PORTFOLIO PLANS (RELEVANCE TO):

- 8.2 The Committee should have regard to the Council's priorities as set out in its Sustainable Community Strategy and Portfolio Plans, with particular reference to 'An Efficient and Effective Council'.

9 RESOURCE IMPLICATIONS:

- 9.2 The 'average' cost of a polling place (premises hire plus staffing costs) is £520. In the City Council's area, the pattern of settlements mean that the smallest electorate for a polling place is 102 and the largest is 2,975, with the average being 1,108. Staffing levels are, of course, adjusted accordingly.

- 9.2 Apart from the Electoral Commission guidance referred to above, there is no statutory limit regarding either the minimum or maximum number of electors per polling place.

- 9.3 As stated above, cost is not the major consideration with this review and the emphasis must be placed upon providing reasonably accessible and convenient polling places for electors to vote in person. The Regulations specifically require that each polling district must have its own polling place, unless there are no suitable premises available

- 9.4 Finally, it is not lawful to close a polling place and insist that all electors vote by post.

10 RISK MANAGEMENT ISSUES

- 10.1 None, provided Government legislation and Electoral Commission guidance is followed and applied in a practical manner, based on local experience.

BACKGROUND DOCUMENTS:

Representations held on subject file.
