Update

1. The existing house was assessed by Historic Environment and it was concluded that it is not a non-designated heritage asset. The existing building copies historic design styles (inspired by a traditional style of architecture seen on historic buildings), but the building itself is not historic. Chilbolton Avenue was not laid out until the 1930s (at the earliest), and according to historic map data, the earliest building shown on this site is in the 1961-63 OS map.

2. A further two objection letters have been received from residents, that have previously objected to this proposal. Their comments have been noted and circulated to the Committee members and do not alter the recommendation.

Update

1. Additional supporting comment received 12.07.2023 from neighbour at 5 Hillside. They outline they support the plans as they will improve the aesthetics of the dwelling and do not find the annexe to be overbearing and support the material use.

2. Update to condition 04: The annex hereby permitted shall be occupied in association with the dwelling house or shall be used for the purposes ancillary to the dwelling house. At no time shall the annex be occupied as an independent unit of accommodation **or be used as tourist accommodation.**

Reason: To accord with the terms of the application and to prevent the creation of inappropriate units of accommodation, possibly leading to over intensive use of the site.

3. Clarification that the existing dwelling is a 20th century dwelling and not a 21st century dwellings as stated within the report.

For clarification, application 22/01852/FUL authorised the removal of 2 trees subject to this TPO confirmation. This was to allow a safer access into the site and the case officer, taking account of all material considerations, agreed with the submitted arboricultural reports which required the removal of 2 trees adjacent to the access. The applicant would be permitted to remove the trees if they choose to implement the application.</p> <p>The recommendation for TPO2333 continues to include the 2 trees subject to removal under the above application. This is to ensure that the trees are retained in the event that 22/01852/FUL is not implemented.</p>
